AI PARTNERS · THE AI ASSESSMENT

Five days, your team's numbers, a working demo.

A paid diagnostic that finds the work software should be doing, ranks the prize money, and proves one fix live on your own data. **Not an opinion. A map you can hand to any CFO.**

DURATION
5 working days
from go to ranked findings

METHOD
7 steps
owner call to decision sheet

SOURCE OF NUMBERS
Your people
their actual hours, tools, stalls

THE CHECK
€1,250
credited in full within 30 days against any build

WHAT LANDS ON DAY 5

Ranked list, working demo, money map, decision sheet. Titled for your business, yours to keep, raw material included.

WHAT IT NEVER IS

A slideware audit. The demo runs on your redacted files. If the answer is "not worth it", we say that in writing.

WHAT IT TAKES FROM YOU

Twenty minutes on day 1, one forwarded survey link, read-only access. Zero prep beyond that.

THE SHAPE OF THE WEEK

DAY 1
Owner call. Twenty minutes, no pitch, we map the machine.

DAYS 2–3
Team survey books its own interviews. AI notetaker captures all.

DAYS 4–5
Working demo built on your files. Returns scored and ranked.

DAY 5 · YOUR CALL
Decision sheet: build now, build later, or leave alone.

THE STACK WE BUILD AND RUN ON

Claude · Anthropic · Google · n8n · Supabase · Vercel · GitHub · Stripe · Figma

THE PROBLEM

Nine tiles of software. The work still moves by hand.

The stack costs four figures a month, nobody in the company owns it, and the tools never talk to each other. **The rent rises. The hours stay.**

EVIDENCE · THE PILE YOU ARRIVE WITH

- Zapier
- Mailchimp
- CRM
- SCHEDULER
- FORMS
- HELPDESK
- PIPELINE
- REPORTS
- + NEXT YEAR'S

THE ARITHMETIC OF THE PILE

Every tile is rent. **The vendor keeps the asset, the data, and the upside. You keep the invoice**, plus the manual work the tool was supposed to eat.

DRIVERS · WHERE THE MONEY LEAKS

01 · REPEATED BY HAND

Skilled hours on the same moves

Quoting, dispatching, invoicing, following up, reporting. Daily, by people whose hours cost real money.

02 · DATA EVERYWHERE

Nobody sees the whole machine

Inbox, spreadsheets, three dashboards, a CRM nobody fills in. Fragmented data cannot be fixed, only fed.

03 · NO NUMBER FOR AI

Which tool pays back, this quarter?

Every product promises AI now. Which one returns cash in your business? That question is still open.

THE QUESTION THE PILE CANNOT ANSWER

Which of these tiles eats which hour? Nobody inside the company can say. The assessment exists to answer exactly that.

THE METHOD

Seven steps, five working days, zero prep from you.

Your team's real hours and tools, collected in one week. **Nothing rests on memory, and nothing on a consultant's guess.**

1 **The owner call. Not a pitch.**
Twenty minutes. Where work slows, who does what, what hurts. We listen, record, and map.

2 **The team survey that books itself.**
Three minutes per person: stalls, software, hours per task. It ends by booking their own interview slot.

3 **30-minute interviews.**
"You said dispatching stalls. Tell me more." An AI notetaker captures every word, so recall is never the record.

4 **Your files, redacted.**
A booking, an invoice, a run sheet. Names blurred, treated as confidential, deleted on request.

5 **A working demo on your data.**
The single worst workflow, actually done by software, on your own examples. The moment it clicks.

6 **The ranked money map.**
Every opportunity scored by hours saved and cost, from your team's numbers. Build first, build later, leave alone.

7 **You decide with numbers.**
What it returns, in writing, before you pay for any build. If it is not worth it, we say that too.

✓ **You keep everything.**
Survey raw data, transcripts, demo, ranking. The whole engine, documented and handed over.

GUARDRAIL
Read-only access. We look, we never move or edit your records.

GUARDRAIL
NDA on request, standard on every engagement.

GUARDRAIL
Nothing trains on your data. Files are used, never absorbed.

GUARDRAIL
Deleted on request. Your call, no forms, no delay.

Zero prep from your side | 7 steps, 5 days, 1 team survey | AI notetaker, human interviewer | Demo on your data, not ours

WHAT COMES BACK

Four real covers. One ranked plan, yours on day five.

Page one of four delivered assessments, exactly as clients received them. **Your set ships titled for your business.**

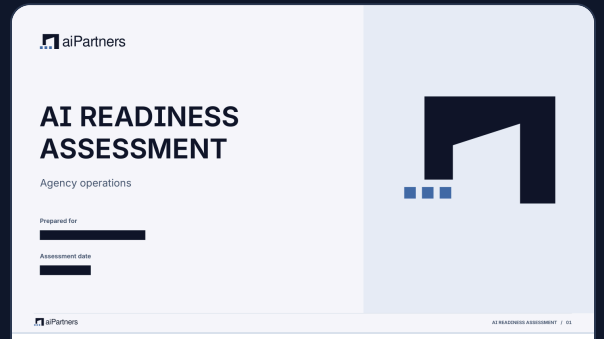

EVIDENCE · PAGE 1 OF DELIVERED WORK

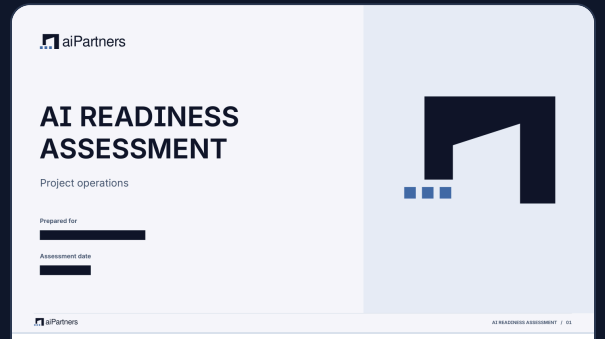

AI Readiness Assessment · Consulting operations

AI Readiness Assessment · Sales operations

AI Readiness Assessment · Agency operations

AI Readiness Assessment · Project operations

Covers from delivered assessments. Client names and dates redacted in the source documents.

Eight-page AI Readiness Assessments, delivered 2026. Each ships with the full ranked money map inside.

8 pages
every assessment, money map included

4 types
consulting, sales, agency, project ops

DRIVERS · WHAT IS INSIDE THE SET

RANKED LIST

Every AI opportunity in your business, **scored by return**, built from your team's hours and rates.

WORKING DEMO

Your worst workflow, done by software, **on your redacted files**. Live in front of you.

MONEY MAP

Hours back, cash back, payback period. **In writing**, before you commit to any build.

DECISION SHEET

Build now, build later, leave alone. **One page, no fluff**, defensible to any CFO.

RAW MATERIAL INCLUDED

Transcripts, survey data, the demo itself. Yours to keep, including the day you stop working with us.

PROOF

1 hour of skilled work to about 5 minutes, priced within 6%.

The engine behind this assessment already produces in the field, in the method's documented case, and in our own shop.

FLEET CASE DELIVERY
6 tabs
money map, every process scored

DOCUMENTED CASE
1 h → ~5 min
inspection report to priced proposal

PRICE ACCURACY
within 6%
of the human freelancer's price

OUR OWN STACK
29 deployments
portal, pre-qualifier, call-recap engine

LIVE CASE · US GROUND-TRANSPORT FLEET

Quoting engine on the owner's rules

Full assessment delivered: audit, findings, six-tab money map. The owner's real rate card, **every vehicle, zone, and surcharge**, wired into a quoting engine spec. The machine quotes from his rules or hands it to a human. Never guesses.

WHAT IT PROVES

The findings convert into a **build spec any developer can execute**, not a slide that dies in a drawer.

Client names withheld by policy.

THE METHOD'S DOCUMENTED CASE

Inspection report to price proposal

An hour of skilled work, done by the demo in minutes, **priced within 6%** of the human freelancer. The close came from the same engine this assessment runs.

WHAT IT PROVES

The engine **prices real work at market accuracy**, on documents it has never seen before.

Source: Certified AI Partners, Provo UT. Documented client case.

OUR OWN MACHINE, LIVE NOW

We eat our own cooking

Client portal, lead pre-qualifier, call-recap engine that texts us after every meeting: **29 deployments, all live**. Not a consultant with a PDF.

WHAT IT PROVES

We run the same stack we sell, **29 deployments deep**, before we ask you to bet on it.

THE COMMON THREAD: every number on this slide came out of the same 7-step engine this deck describes. The assessment is not a claim about the method. **It is the method, running.**

aipartners-platform.vercel.app · client portal, live

prequalifier.vercel.app · lead engine, live

29 deployments · internal count, November 2026

THE LADDER

Six rungs, €1,250 to €7,500 a month, all in plain sight.

Start with the Check. **It is credited in full against any build within 30 days**, so the diagnostic never costs twice.

#	RUNG	WHAT YOU GET	PRICE
01	**The Check** START	The five-day diagnostic. Everything in this deck. **Credited in full within 30 days against any build.**	€1,250
02	**Deep Diagnostic**	For bigger machines: every process and every team mapped, end to end.	€3,500–5,000
03	**Sprint**	Two weeks. First build live in your stack.	€2,900
04	**Partner**	Your software department. Monthly builds, portal, return in writing. **60-day minimum.**	€3,999/mo
05	**Department**	A whole function, staffed and shipped.	€7,500/mo
06	**Custom**	Platforms and migrations. Scope agreed in writing. **50% deposit.**	from €10,000

HOW THE CREDIT WORKS

Run the Check, decide within 30 days, and **the full €1,250 comes off any build**: Sprint, Partner, Department, or Custom.

HOW TEAMS USUALLY START

Check first, then one Sprint to prove the return, then Partner for the monthly rhythm. **Leave any month.**

WHY TRADES, NOT DISCOUNTS

Price falls only when scope swaps: **fewer rungs, longer commitment, or a trade-in**. Never a coupon, never a fake timer.

Trades, not discounts | Split payments | Leave any month | Check credited within 30 days | Ladder effective November 2026

START

Say "Check" and the five days start this week.

Fifteen minutes. You talk, we listen. **If a Check is not worth your money, we say so, and you keep the advice.**

The Check costs €1,250.
Guessing costs more.

BOOK THE FIFTEEN-MINUTE CALL

cal.com/bjovibes/15minaipartners

Say **"Check"** when you book and the five days start that week.

Free, fifteen minutes | **No deck, no pitch** | **You keep the advice either way**

WHAT THE CALL SETTLES

Whether a Check is worth it, answered on the call, free.

Which process we would demo, picked from your worst bottleneck.

Which week we would start, five working days, end to end.

YOUR FIRST WEEK, MAPPED

DAY 1

Owner call. Twenty minutes, no pitch. We map where work slows.

DAYS 2–3

Survey + interviews. Your team books its own slots. AI notetaker captures all.

DAYS 4–5

Demo + money map. Your worst workflow, done by software. Ranked returns, in writing.

DAY 5 · YOUR CALL

Decision sheet. Build now, build later, or leave alone. Numbers, not pressure.
